WORK EXPERIENCE

Weblizz   **Lagos, Nigeria**

Software Developer (Intern)   2023 - Present

- Managed my team and implemented an agile production model to deliver all project within 6month, yielding a 200% return on invested resources.
- Built a product that gained 2000 user in one month after successful lunched.
- Gained promotion from intern position to junior software developer role.
- Got familiar with scaling and performance concept to seamlessly build good product that meet our client's needs.
- Got the chance to learn new trending tools to enhance development and client's satisfaction.

PROJECTS

CloudFront | *Typescript, React.js, Express.js, MySQL, Tailwind Css*   January – 2024

- Develop an application that allow user share and manage files across the web.
- Implemented web socket (Socket.io) for real time interaction.
- Used MySQL database to store user credentials and manage every users file.
- It allow user to store important files saving the user device some space and also severing as a backup for the user.

Konnect | *Typescript, React.js, Express.js, Mongo DB, Tailwind Css*   September 2024

- Created a bot that fetches updated job post using python (Beautiful Soup).
- Allow user to apply for their desired job.
- Stores all current job post using mongo DB database.
- Implemented caching mechanism to increase performance.
- I was able to implement search and filter functionality to give the user more control.
